PROFESSIONAL SUMMARY

Engineering and fraud prevention executive with 20+ years of experience building and scaling global risk, data, and software organizations.Currently leading a 40-person implementation and engineering function at Appriss Retail, driving AI-enabled automation, platform standardization,and operating model simplification that reduced client go-live timelines by 40%. Previously built and led GameStop's global e-commerce fraud organization,reducing fraud losses by 68% through ML-driven detection, real-time risk systems, and cross-functional alignment with Finance, Security, and Engineering.Recognized in the top 1% at American Express with the President's Award for delivering measurable risk reduction and platform-wide innovation.

WORK EXPERIENCE

Senior Director of Implementation — **Appriss Retail**, *Irvine, CA (Remote)* 12/2024 – Present

- Simplified and restructured the implementation organization, redefining reporting lines and roles across 8 direct reports (4 SWE Managers, 1 QA Manager, 1 Director of Data Engineering, 1 Product Owner, 1 Scrum Master) and ~40 total staff.
- Reduced client go-live time by 40% through process redesign, workflow automation, and organizational streamlining.
- Deployed AI-driven tooling for automated data discovery and QA validation, significantly reducing manual effort in ETL pipelines and data definition workflows.
- Architected a universal order model unifying retail and e-commerce channels, eliminating data silos across the platform.
- Led company-wide data standardization initiative, establishing consistent definitions across all business units.
- Own the global implementation process end-to-end, spanning software engineering, QA, data engineering, and product delivery.

Director, E-Commerce Fraud — **GameStop**, *Grapevine, TX (Remote)* 03/2022 – 12/2024

- Inherited an under-resourced fraud function and transformed it into a global operation, driving key optimizations and building the technology stack from the ground up.
- Reduced fraud rates by 68% through machine learning techniques, fraud trend analysis, policy rules, and real-time alert systems.
- Collaborated directly with the CFO on loss prevention, the CISO on security, and the CTO on technical architecture.
- Developed and implemented strategies to combat ATO, card testing, AML, transaction fraud and return fraud.
- Built and automated the global chargeback mitigation and response programs, turning a reactive process into a proactive, data-driven pipeline.
- Stood up real-time monitoring and alerting infrastructure on GCP BigQuery, Amazon S3, and REST-based integrations with 3rd party data providers.

Manager, Solution Productization — **Accertify (American Express)**, *Itasca, IL* 01/2014 – 03/2022

- Created the solution productization function from scratch, defining the playbook for standardizing anti-fraud systems across retail, digital, travel, airline, and ticketing verticals.
- Designed reusable fraud and chargeback prevention components deployed to every Accertify client globally.
- Rewrote core fraud detection algorithms, materially improving accuracy and reducing false positives across the platform.
- Recognized with the President's Award for top 1% performers globally at American Express.
- Built a comprehensive fraud analytics and reporting system that became a key differentiator in client retention and sales.

- Coordinated cross-functional teams across engineering, product, and client services to ship fraud prevention tooling into existing client infrastructures with zero downtime.

Lead Developer, Mobile / Web — State Farm Insurance, *Bloomington, IL* 04/2008 – 01/2014

- Led the development of State Farm Pocket Agent for Windows Phone 7 and 8, one of the first mobile insurance apps in the industry.
- Architected the backend service aggregation portal that unified data feeds across all mobile platforms into a single API layer.
- Won State Farm Hack Day for two consecutive years (2009–2010), prototyping features later adopted into production products.
- Introduced code review practices and development standards that became the team's baseline for quality and maintainability.

CTO — Realinked.com, *Chicago, IL* 02/2010 – 08/2011

- Founded and built an online real estate brokerage from zero — designed, developed, and operated the full technology stack.
- Drove the platform to profitability and executed a successful exit within two years.

Software Engineering Manager — Wolfram Research, *Champaign, IL* 03/2004 – 04/2008

- Promoted from tech support to software engineering manager within two years, recognized for technical depth and leadership potential.
- Designed and shipped the Image Processing, Import/Export, and 3D Graphics frameworks — core components still in Mathematica today.
- Led a team translating advanced mathematical research into production C++ across Windows, Linux, and macOS.
- Drove performance optimization initiatives that measurably improved processing efficiency in large-scale computational workloads.

SKILLS

Leadership & Global Operations	Technical & AI / Automation
Global Org Design & Restructuring	LLM / Generative AI (GPT, Claude, RAG)
Cross-Functional Program Leadership	ML-Driven Fraud Detection & Prevention
Vendor & Partner Strategy	Returns Authorization & Policy Engines
C-Suite P&L Reporting & ROI Delivery	Chargeback Mitigation & Dispute Mgmt
Agile Transformation / Scrum at Scale	AI-Automated ETL, Data Discovery & QA
Mentorship & Talent Development	Python, C#/.NET, SQL, JavaScript
Stakeholder Management (C-Suite)	PostgreSQL, MS SQL, GCP BigQuery
Change Management & Process Redesign	RESTful APIs, Microservices, Docker
	Real-Time Monitoring & Alerting Systems
	Tableau / Power BI / Splunk

EDUCATION

Bachelor of Science, Computer Engineering — University of Illinois, Champaign-Urbana *(Dean's List)* 2003

Bachelor of Science, Civil Engineering — University of São Paulo, São Carlos, SP, Brazil 1999
